

Strategic opportunities

NV has increased its involvement in high profile DHSC/ NHSE England (NHSE) strategic plans. To support priorities implementation, it is important we understand our strategic opportunities

10-year plan:

Co-chair of health inequalities vision group, with LEP involvement, and continued engagement in final plan
NEXT STEPS: Continue to influence meaningful change in how people with health inequalities use the NHS, including pushing for better patient experience measurement

Elective recovery plan

2025: Landed important concessions on health inequalities, including data and impact of transport

NEXT STEPS: Ensure actioning of Integrated Care Board health inequalities plans and minimum patients' standards are robust and meaningful, with transport needs addressed

Red tape review:

With LEPs leveraged role in External Review Groups and other groups to land concerns on medication shortages and poor patient communication/admin processes

NEXT STEPS: Ensure implementation of review reflects these priorities, and push for better admin across the NHS

3 big shifts: Involved in conversations with NHSE/ DHSC/ Number 10 (Cabinet office)

NEXT STEPS: Help aligned Gov policy to align with our priorities:

- Digital exclusion;
- Grass roots prevention/ screening
- Build trust in new community structures
- VCSE involvement and co production across all shifts
